Employment

Senior Developer

Red Hat - Raleigh, NC

TekSystems

December 2021 - May 2023

- Maintained 3 existing legacy Spring Boot Java applications through monitoring, documentation, and bug fixing
- Architected and developed new applications using NestJS, React and Sass
- Configured and deployed new and existing applications to Openshift via Kubernetes
- Created Python scripts for database record export to CSVs, and MongoDB database schema migrations

Senior Developer / Technical Lead

Raleigh, NC

BlueacornICI

April 2019 - December 2021

- Created an internal Spring Boot and React application to manage over 500 employees' work experience and dynamically generate PDF resumes on entered information
- Configured and customized a design pattern library for a large bank's brand redesign using the Fractal framework
- Lead and developed a React and Redux application with Okta integration for AEM using the AEM SPA Mapper while providing support for Java servlet API implementation

Software Associate

Synchrony Bank - Stamford, CT

Capgemini

June 2018 - April 2019

- Developed and designed a NodeJS, React Redux application to manage marketing campaign codes
- Train and onboard additional developers for NodeJS and React development
- Implemented Google Analytics & Adobe Analytics tagging on a large scale website tracking 500,000+ visitors daily
- Created a JS test suite inside a tagging solution to automate validation of analytics tagging in lower environments
